

REAP THE BENEFITS OF AWS CLOUD WITH THE AWS MIGRATION SERVICES BY CDW

Migration and Planning Services (MAPS)

Growth in cloud-based services and infrastructure means organizations are finding it harder to plan and implement complex technology, especially in the cloud. CDW will help you strategize, assess, adopt and integrate securely and seamlessly to the cloud. Migration and Planning Services (MAPS) is a comprehensive suite of consultative planning options to help your business gracefully and effectively move the right workloads to the cloud.

CDW eases the transition related to migration and helps with the critical elements of optimization, cost, experience, management, support and more. CDW provides a comprehensive suite of options based on your needs and where you are on your migration journey. CDW will take a consultative approach to helping with your transition. We will take the time to learn about your business, your challenges and your goals. Armed with that knowledge, we will create a graceful and efficient migration strategy.

Benefits

- **Application Modernization**

Moving your applications to the cloud gives you the speed and agility you seek for your customers and your coworkers. However, there are some applications that seem too big, too complicated and too entrenched to be moved. With CDW's Application Modernization, turn your legacy applications into small, manageable microservices, containerizing them and gracefully moving them to the cloud.

- **Migration and Planning Service (MAPS)**

Put an end to one-size-fits-all subscription models, resource-heavy datacenter management, and inefficient manual processes. Meet business demands more cost-effectively with pay-as-you-go pricing, task automation, and access to a migration support team. Businesses save an average of 31% in infrastructure costs by moving to AWS.

- **Reduce up-front and long-term investments**

CDW eases the transition related to migration and helps with the critical elements of optimization, cost, experience, management, support and more. CDW provides a comprehensive suite of options based on your needs and where you are on your migration journey.

Migration made simple

Determining how to shift your workloads to the cloud can be overwhelming to do on your own. Through our partner community, AWS provides data-backed insights to drive smarter migrations so that projects take minutes or hours—instead of weeks or months. AWS Partners are professional services firms that help organizations of all types and sizes accelerate their journey to the cloud; AWS Professional Services can help evolve your organization into a service-based model. And AWS Microsoft Workloads Competency Partners identify the most qualified vendors for migrating and modernizing your Windows-based applications to AWS. By leveraging our dedicated partners, programs, and training, you don't need to staff your business with technical resources to make it all happen.

Migration and Planning Services (MAPS)

Migration and Planning Services (MAPS) is a comprehensive suite of consultative planning options to help your business gracefully and effectively move the right workloads to the cloud.

Migration Adviser is a high-touch consultative service which will provide you with both industry best practices and custom strategies and information based on your unique business.

Migration Consultant takes this to a whole new level using the very best tools and talents in the industry to provide you with an actionable deliverable.

Migration Director puts it all together, combining Adviser and Consultant and then doing the work, moving you and the workloads that work best in the cloud, up to the cloud.

Navigate your unique migration journey with comprehensive support

Small and mid-sized businesses operating on aging hardware and strained IT staff have found a better way to store, protect, and recover their data by adopting cloud technology—leveling the playing field with larger organizations. AWS helps businesses migrate to the cloud at their own pace without making changes to underlying architecture. Managed cloud services remove the limitations that on-prem and collocated datacenters present, including skill set shortages, long lead times for new hardware, and the security risks that come with outdated IT infrastructure.

The advantages don't stop there. Whether you are running Windows or SAP on AWS, we have the experience to help. Get more from your investments as AWS offers access to skill set training and a complete software, services, support, and partner ecosystem. Our right-sized approach will help you fully realize the benefits of the cloud and meet your goals, from cost-effective operations to a more flexible work environment.
